Oh crap. I just realized that Zizi mentioned the week of Aug. 18 (I just assumed the week of the 11th). If that is the case, Monday (18) – Tuesday (19) would be best. I expect to be wrapping up by the 21st. Very sorry for the confusion and thank you Sona identifying is issue. Hopefully this hasn't messed up anyone travel plans or stamped TA.

Haystack #1 planned work schedule:

Aug 11: Mobilize the site

Aug 12 – 15: 99% gamma scan of site

Aug 13 – 20: GeoProbe and sampling activities

Aug 16 – 20: Additional gamma scans / characterization as needed

Demobe Aug 21

Since varying site conditions, weather and equipment issues are expected, the above plan will be fluid.

We are planning to work on Saturday (16) OR Sunday (17), depending on weather and progress (not both days)

From what I understand Linda's getting there on Aug. 12, Clancy and Robin from OSRETI and R6 on Aug. 13, and Zizi on Aug. 21. If that's the case, would it make sense for me to get there on Aug. 19, be on site on Aug. 20 and 21, and get back on Aug. 22? I thought it might be a better idea for me to overlap with Zizi the second week since there will be a number of folks out there the first week, but I'm flexible and happy to adjust per what you all think is best. Zizi will be driving there from another part of the Nation so won't have much of a chance to carpool with her.

Per Randy's direction, I'm planning on flying into Albuquerque and staying at a hotel in Gallup. Randy, I think you also said that I don't need to rent an SUV—so I can rent a less expensive car & just meet up with an EPA person at some point to get to the site? What would be the best way to coordinate that?

I've left messages for Jeff Woodlee and will make sure to have a TLD badge, work gloves, and steel toed boots when I come. Will also bring my lunch, water, and sun protective clothing. Any other tips welcome!

Really appreciate the opportunity to join,

s.

If it works for you I would like to come out Thursday that week. I will work out my travel arrangements with Sona as I plan on being in Cameron AZ on Wednesday.

Zizi,

Sorry for the delayed response. I do hope you come out. I think it's a good opportunity to share information and see what we have been doing. We are using newer technology in how we collect and manage our gamma measurements. I think the best day(s) to come out, actually being on site, would be Wednesday and / or Thursday of that week. Monday we are mobilizing the site and Tuesday could be a lot of hurry up and wait. We should be a well oiled machine by Wednesday. Sona and I have been also discussing visiting and dates. Depending on what your plans are before or after, maybe you guys can coordinate portions of your travel.

If you want to discuss further, I'm out of the office tomorrow, but in on Monday, taking A/L reminder of the week. I'm always available via phone / email.

Thanks,

Hi Randy,

I wanted to take you up on your invitation to observe work. I am available to come out on the week of August 18th if that works for you. My plan is to spend a day with your team before I attend to other meetings related to my Cameron Area mine site. If there is a day that week you prefer me to come out please let me know. My other meetings with NNEPA and the PRP EPNG are TBD. I wanted to nail down the visit date to your site first.

Thanks!
